PROFILE

R&D Software Manager at Keysight Technologies, leading a **10-engineer team** that builds PTEM on OpenTAP for global EV/ADAS test automation programs. Promoted in September 2026 after seven years as the platform's lead engineer and architect. **15 years** across automotive test, semiconductor equipment software and a startup. Sole software developer on the Keysight E8717A LiDAR Target Simulator and **co-inventor of two US patents**. Hands-on in C#, C++ and Python, with a practical approach to applying AI where it gives real engineering leverage.

10	2	E8717A	15 yrs
engineers led on PTEM / OpenTAP	US patents in LiDAR target simulation	Keysight product, sole software developer	automotive & semiconductor software

EXPERIENCE

Keysight Technologies — Penang, Malaysia

R&D Software Manager Promoted — Sep 2026 – Present

- Manage a **10-engineer R&D software team** delivering PTEM on OpenTAP for global EV/ADAS test automation programs.
- Own the team roadmap, delivery planning and stakeholder alignment across global automotive programs.
- Hire, coach and develop engineers; run performance reviews and career growth plans.

R&D Software Lead Engineer — Oct 2019 – Aug 2026

- Led a team of 10 on **PTEM architecture and development**, built on OpenTAP, for global EV/ADAS test automation programs.
- Scrum Master for the team; **established the SQ release process** across global automotive programs.
- Sole software developer on the 4-engineer LiDAR Target Simulator team; **co-invented 2 US patents in 2 years**; productized as the Keysight E8717A.

WAFTECH — Penang, Malaysia

Motion Control & Software Dev Senior Engineer — Apr 2016 – Sep 2019

- Built next-generation machine control software in C# and WPF.
- Implemented SECS/GEM integration for semiconductor equipment communication.
- Led on-site deployments and mentored junior engineers.

Machine Automation Software Engineer — Oct 2014 – Apr 2015

- Developed motion control and wafer handling software in C# and WPF.

Makerzone Sdn Bhd — Penang, Malaysia

Co-Founder — Apr 2011 – Mar 2016

- Co-founded and ran a 3D printing service business; built the company website and delivered customer projects from design to delivery.

Keysight Technologies — Penang, Malaysia

R&D System Engineer — Jun 2011 – Oct 2014

- Developed automotive test systems in C++; supported the TS-5000 hardware handler library.

SKILLS

Leadership	Engineering management, hiring & coaching, roadmapping, Scrum Master, release process
Languages	C#, C/C++, Python, JavaScript, PowerShell
Platforms	OpenTAP, PTEM, .NET, WPF, Git, Claude API, Cloudflare Workers
Domain	EV/ADAS testing, LiDAR, HIL, CAN/LIN, SECS/GEM, Automotive SPICE
Spoken	Chinese (native), English (professional), Malay (conversational)

PATENTS

US20220260714A1
Automated LiDAR Target Simulation Scanning Systems & Methods

US20230132855A1
Automated LiDAR Target Simulation Scanning Systems and Methods

EDUCATION & CERTIFICATIONS

B.Eng. (Hons) Electrical & Electronic Eng. 2007 – 2011
Universiti Tunku Abdul Rahman (UTAR)

Agile SCRUM for Practitioners Feb 2026
DreamCatcher Consulting

Practical AI with Machine & Deep Learning Mar 2021
